

# Insulclad 260, 360, 560 Thermal Entrances by Kawneer

## *Engineered Entrances with Climate Control Efficiency*

Kawneer's Insulclad Entrances provide thermal efficiency for the entire building facade and are available in 260 Narrow Stile for moderate traffic applications, and 360 Medium Stile and 560 Wide Stile for heavy traffic applications. All doors are thermally enhanced with interior cladding, which has the added advantage of enabling dual-color design.

Insulclad Entrances are available as a single-source package of door, fully integrated door fram, (with or without transoms) and integrated hardware. Center plane Trifab VG 451T (Thermal) frames are standard and Insulclad Entrances are also compatible with 1600 Wall System, as well as other Kawneer framing systems. The total package and options allow easy adaptation to custom entrance requirements.
