

# 2000T Terrace Door by **Kawneer**

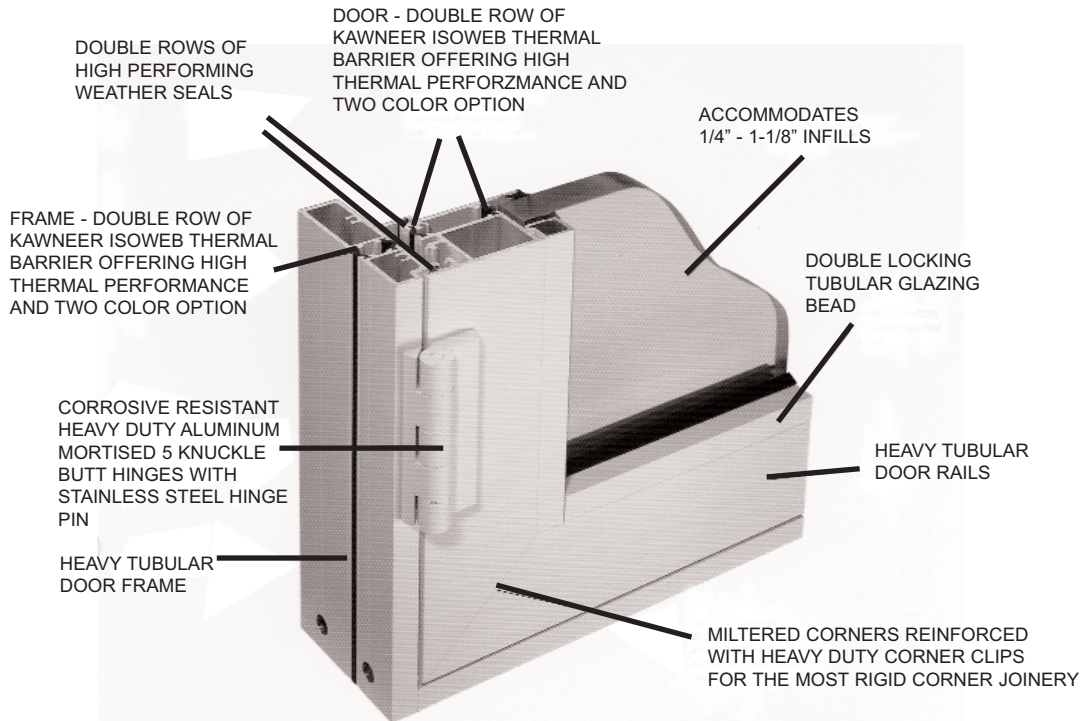

The Kawneer 2000T Terrace entrance is designed by the Kawneer engineering department for the needs of both commercial and heavy commercial codes but with the design elements for both high rise apartment buildings and hotels.

The 2000T comes as either a single or pair of doors and can be glazed with 1/4" to 1-1/8' infills.

Yes, the 2000T meets both low rise and high rise debris impact requirements of coastal building codes.

It has a wide variety of hardware options and can come in any of the standard architectural aluminum finishes.

Contact Romco for any of your Sliding Door and Terrace Door needs.
