

# Kawneer 1010 AND 990 SLIDING UNITS

## THE 1010 SLIDING MALL FRONT

A multi-track unit with parallel stacking for a variety of interior applications. Movable panels can be stacked in-line behind a wall, fixed end panel or as a pocket slider. The floor track may be either recessed or surface-applied.

## 990 SLIDING DOOR

Superior structure for high performance  
The "990" is a high-performance aluminum sliding door engineered for the most demanding residential, commercial and institutional applications. Here is a product you can specify for wind and rain battered high-rise or low-rise buildings. Independent certified tests, no water passed the interior plane of the "990" when subjected to a simulated rainfall with 55 miles per hour wind. The standard 1-3/4" tubular stiles and heavy-duty interlocks mean superior structural integrity.

# ||||| Kawneer 1040 AND 1070 SLIDING UNITS

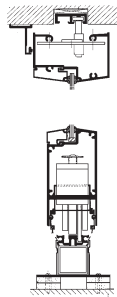

## THE 1040 SLIDING MALL FRONT

A single-track unit with three stacking options for both interior and exterior applications; these include parallel staggered stacking, parallel even stacking and perpendicular / 90-degree stacking. The single track combined with the concealed or remote stacking options allows optimum use of valuable front space. And the heavy-duty aluminum framing permits the use of larger panel sections. Commonly used in bank ATM partitions. A special access door in one panel of the mall front also is an option.

The low-profile track may be either recessed or surface-applied and a draining track with gutters available for exterior applications.

## THE 1070 SLIDING MALL FRONT

Incorporates swing entrances on a single track-age with parallel stacking for heavy-duty exterior and interior applications. When in the closed position, the 1070 sliding Mall Front looks like a 1-3/4" x 4-1/2" flush glazed framing system to complement a building's design.

Three types of floor tracks are available for the fully glazed sliding Mall Fronts, including surface-mounted, recessed and recessed 1040 with gutter. Hardware available with the door is a standard contemporary-styled handle.
